

# RECOPOL™ – GREENING INDUSTRY FROM THE INSIDE

FOR THE INTERNAL FRAMING OF SUSTAINABLE FURNITURE FOR GREEN BUILDINGS

Recopol™ recycled engineering-grade ABS mouldings are a sophisticated eco-design medium for designers and manufacturers of sustainable commercial furniture. Select from a range of standard shells or custom design.

Using Recopol™ shells in your furniture can reduce production times, the volume of materials required, reduce VOCs to meet GBCA IEQ requirements and are able to be re-used, refurbished and returned whole or as off-cuts to Wharington for recycling at end of life.

AutoCAD drawings available on the website.
